

CATEGORY	FEATURE	DETAILED FEATURES
<h2>Network Management</h2>	Crew Wifi Pins (Captive Portal Features)	<ul style="list-style-type: none"> • Captive Portal Pin Creation based on WAN • Self Signup with payment gateway • Auto renewal / Batch processing • Bandwidth limits and data thresholds • Monthly/Weekly/Daily Limits • Time based limitations • Live reporting on data usage • Data top-up
	Data Counters	<ul style="list-style-type: none"> • All LAN->WAN network readings separately • Aggregate of LAN • Aggregate of WAN • Separate WAN readings • Graphs and analytics of data utilization over time
	Network Management	<ul style="list-style-type: none"> • WAN failover, load balancing • Data threshold based WAN cutoff • Unrestricted creation of networks /subnets on separate VLANs • Multiple routing tables for complex setups • Multi WAN Monitoring • QOS • Cable Disconnection Alerts
	Firewalling	<ul style="list-style-type: none"> • Separate firewall filter rules for crew and business • Granular firewall rules per WAN • Domain / IP -based filtering • Address lists (IP sets) • Firewall templates
	DNS Filtering	<ul style="list-style-type: none"> • DNS Based Content Filtering (LAN) • DNS Based Malware Block
	Audit Trails	Complete audit trails for all actions taken on the platform
	PAM access for L2 support	Generate temporary admin credential to login to firewall interface
	Multi-Tenant Access	Secure platform segregating data between fleets
	RBAC	Grant Access to L1,L2 support, Management with Granular Role based Access Controls
	Netflow	Enhance maritime security with real-time NetFlow traffic analysis and anomaly detection for ships.
Remote Service Access	Directly access services running on vessel systems from the platform	

CATEGORY	FEATURE	DETAILED FEATURES
Network Protection	Network IDS/IPS	In-line network intrusion prevention system, updated with the latest threat intelligence on an hourly basis
Endpoint Protection	Host based EDR	Integrated with ESET EDR (External)
Correlation of Network & Endpoint Protection	IDS + EDR - Correlation (XDR)	Correlation of EDR+IDS data (XDR)
E26	E26 Compliance	<ul style="list-style-type: none"> • Correlation of data from Tiers 3,4,5 with additional security and risk management metrics to generate a compliance report that is suitable for class • Hardware Asset Inventory (automated/PCAP/manual entry) • Software/Firmware Asset Inventory (automated for machines with endpoint agent) • Documentation/Schematic upload • Purdue Model-based topology • Live Vulnerability Listing • Risk Report • Compliance Score and comparisons with fleets/other vessels (in pipeline)
Satellite Integration	Starlink & OneWeb API Integration	Real-time connectivity monitoring and automatic failover between Starlink and OneWeb satellite networks

Securing Every Mission
Powering Every Vessel
